

CLAIMS

1. A clockwork comprising at least one first pointer (40, 42, 44) and a second pointer (46), which clockwork is designed for indicating a local time by means of a revolving pointer movement over a dial, and which clockwork further comprises a drive  
5 mechanism coupled to the pointers, wherein a pointer arrangement is present that comprises said at least one first pointer (44) and indicates a local time with a slowest-pointer period of revolution of twelve hours and one or several further pointers (40, 42) coupled thereto for shorter periods of revolution, such as minute and/or second hands, characterized in that said second pointer (46) indicates a world time with a period of  
10 revolution of twenty-four hours in cooperation with a scale (22) present on the clockwork of which the number of graduations is a multiple of 24.
2. A clockwork as claimed in claim 1, wherein said second pointer (46) cooperates with a scale (22) of 360 degrees, each degree corresponding to a time interval of four minutes.
- 15 3. A clockwork as claimed in claim 1, wherein said pointer arrangement is independently adjustable with respect to said second pointer (46) so as to set a time that differs in dependence on location, while said second pointer (46) continues to indicate a universal or world time.
4. A clockwork as claimed in claim 2, wherein said pointer arrangement comprises  
20 three pointers (40, 42, 44).
5. A clockwork as claimed in any one of the preceding claims, provided with a twelve-hour scale (20), a twenty-four-hour scale (24), and a scale (22) divided into 360 units (° or turns).
6. A clockwork as claimed in claim 5, wherein all three scales (20, 22, 24) are  
25 arranged in a fixed position.
7. A clockwork as claimed in claim 5, wherein the twenty-four-hour scale (24) is constructed as an adjustable rotary ring, and the other two scales (20, 22) are fixedly positioned and are present within the twenty-four-hour scale (24).

8. A clockwork as claimed in any one of the preceding claims, further provided with a time indication in the form of a block (50) with changing numerals associated with said second pointer (46).
9. A clockwork as claimed in any one of the preceding claims, wherein a visible  
5 portion of the clock face is provided with a legend (52).
10. A watch provided with a clockwork as claimed in any one of the preceding claims.
